

This morning (oct 11, 2004)at approx 8:00AM a local radio station (KONA 610am) aired a program that was sumarized as it came on as a discussion of the presidential debates. The speaker was a Dr. Furman that was introduced as an economist in the Clinton administration. The person was anything but neutral in he presentation and about 5+ minutes the announcer stated that this speaker was a John Kerry campaingn staffer. I was offended and disappointed that was was billed as a discussion was in truth a partisan campaign bashing and repeat of Senator Kerry's debate remarks. I called the station and stated my disappointment and was told that this gentleman was all they could get and no one from the opposition was forthcoming.

Thank You
